<sup>1</sup> In kg of cotton laundry for the standard cotton programme at full load.

<sup>2</sup> based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used.

<sup>3</sup> If the household tumble drier is equipped with a power management system.

<sup>4</sup> This programme is suitable for drying normal wet cotton laundry and is the most efficient programme in terms of energy consumption for cotton.

<sup>5</sup> If the household tumble drier is a condenser tumble drier.

<sup>6</sup> For the standard cotton programme at full load.
