ProCare
Shine 40

Rinse aid

Application
Liquid concentrate, acidic. For automatic machine dishwashing in commercial dishwashers with both fresh water and tank wash systems.

Product properties
- Improves and shortens the drying process
- Prevents limescale and protects load items
- Protects decor
- Particularly suitable for cleaning glass

Use and dispensing
ProCare Shine 40 is designed for use in programme sequences in Miele Professional commercial dishwashers.

- Precise and economical dispensing via the internal door dispensing compartment or via an external dispensing pump (depending on model of machine)
- Dispensing recommendation: 0.2–0.5 ml/l (0.02–0.05 %)
- Recommended water hardness level: 0–0.5 mmol/l (0–3 °dH)

Dispensing must be selected based on the load items. Using too much or too little rinse aid may lead to unsatisfactory cleaning results. Based on the dishwasher's factory default settings (for Miele machines, this is usually 0.04 %), adjustments can be made as needed.

When washing, it is recommended to use soft water with a hardness of 0–0.5 mmol/l (0–3 °dH). Higher water hardness levels up to a maximum of 1.4 mmol/l (8 °dH) can, if necessary, be compensated for by increasing the dispensing concentration. However, to protect the dishwasher and the load items, we recommend using a water treatment system (e.g. an internal or external water softener) to achieve the target water hardness.

Please note:
- Do not blend in concentrated form with other products
- When switching products, please note the following:
  - If an external dispensing pump is used, the dispensing system must be cleaned: Rinse thoroughly with water and prime the system
  - When using the internal container, we recommend only refilling it with a new product once the rinse aid refill reminder has appeared
- Operating instructions for Miele Professional dishwashers must be observed.

Technical data
- Density (20 °C): approx. 1.0 g/cm³
- pH value of solution: 6.5–7.0

Ingredients
Surfactants, organic acids, solvents

ProCare
Shine 40

Rinse aid

Storage
- Storage temperature: 5 °C to 40 °C
- No shelf life restrictions if correctly stored.
- Protect from direct sunlight

Risks and safety instructions
For safety and environmental information, see the safety data sheets. These are available from the Miele websites listed below. If used as instructed, the product is safe in respect to relevant guidelines on food processing.
Dispose of containers only when completely empty and sealed. See safety data sheet regarding disposal of residuals.

All information contained in this leaflet is current and correct to our knowledge and experience.
This does not however release users from the obligation of conducting their own checks and tests. A legally binding assurance of specific product properties cannot be inferred from this.

Packaging units and accessories

Designation	Packaging unit
ProCare Shine 40	1 l bottle
ProCare Shine 40	5 l canister
ProCare Shine 40	10 l canister
Canister keys for 5 l and 10 l media canisters	
DTD 2 drip tray for 5 l and 10 l media canisters from the Miele ProCare model series
