		<p>Connection using multi-pole wall socket in compliance with IEC 60309 and IEC 60947 is recommended in order to simplify electrical tests.</p> <p>Install mains isolator according to IEC 60947 on hard-wired connection.</p> <p>Wall socket or mains isolator must be accessible after installation.</p> <p>The use of an earth leakage circuit breaker (ELCB) is strongly recommended. A type B RCD (residual current device) must then be used.</p> <p>If necessary, equipotential bonding with good galvanic contact must be provided in accordance with all appropriate national and local regulations.</p>

SK	Foam vent	Excessive foaming may result in foam discharge through air vent. In order to dispose of this foam, a drain with U tube can be installed on site using conventional plumbing supplies. A branch with an end cap should be provided for this purpose.
