Supplier's address Model identifier WEB385 WCS 125 Edition General product parameters Parameter Value Parameter Value Parameter Value Parameter Value Parameter Value Parameter Height Depth Energy efficiency index EEI, (10) (10) (10) (10) (10) (10) (10) (10)		
Model identifier WEB385 WCS 125 Edition	Miele Carl-Miele-Straße 29, 33332 Gütersloh, DE	
Rated capacity (kg) Rated cap		
Parameter Value Parameter Height		
Rated capacity ^(a) (kg) 8.0 Dimensions in cm Height Width Depth Energy efficiency index EEI _w ^(a) Washing efficiency index ^(a) Usashing efficiency index ^(a) Energy consumption in kWhy per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual energy consumption will depend on how the appliance is used. Rated capacity Again speed ^(a) (°C) Rated capacity Programme duration ^(a) (h:min) Rated capacity Rated capacity Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during Passed on the eco 40-60 programme at a combination of full and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Weighted remaining moisture content ^(a) (%) Foil and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Foil and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Foil and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Foil and partial loads. Actual water consumption will depend on how the applicance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Foil and partial loads. Actual water consumption will depend on how the applicance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Foil and partial loads. Actual water consumption will depend on how the applicance is used and on the hardness of the water. Foil and partial loads. Actual water consumption will depend on how the applicance is used and on the		
Rated capacity ^(a) (kg) 8.0 Dimensions in cm Width Depth Energy efficiency index EEI _w ^(a) Washing efficiency index ^(a) Usashing efficiency index ^(a) Energy consumption in consumption in the eco 40-60 programme at a combination of full and partial loads. Actual energy consumption will depend on how the appliance is used. Maximum temperature inside the treated textile ^(a) ("C) Rated capacity Programme duration (h; (h;min) Rated capacity Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during This product has been designed to release silver ions during Patency efficiency class ^(a) Water consumption in litre per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Weighted remaining moisture content ^(a) (%) Popin-drying efficiency class ^(a) Spin-drying efficiency class ^(a) Programme duration ^(a) (h;min) Half 2:48 Quarter 2:29 Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Networked standby (W) (if applicable) Networked standby (W) (if applicable)	Value	
Energy efficiency index EEL _w ^(a) 41.6 Energy efficiency class ^(a) Washing efficiency index ^(a) 1.031 Rinsing effectiveness (g/kg) ^(a) Energy consumption in kWh per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual energy consumption will depend on how the appliance is used. Maximum temperature inside the treated textile ^(a) (°C) Rated capacity 32 Half 28 Quarter 25 Rated capacity 1400 Spin speed ^(a) (rpm) Half 1400 Quarter 1400 Rated capacity 3:39 Programme duration ^(a) (h:min) Programme duration oise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Off-mode (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during Tis product has been designed to release silver ions during Mater consumption in litre per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Weighted remaining moisture content ^(a) (%) Politying efficiency class ^(b) Spin-drying efficiency class ^(b) Spin-drying efficiency class ^(b) Airborne acoustical noise emission class ^(b) (spinning phase) Off-mode (W) (if applicable) Networked standby (W) (if applicable)	85	
Energy efficiency index EEI _w ^(a) Washing efficiency index ^(a) Energy consumption in kWh per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual energy consumption will depend on how the appliance is used. Rated capacity Auarter Energy efficiency class ^(a) Water consumption in litre per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Rated capacity Auarter Energy efficiency class ^(a) Water consumption in litre per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Rated capacity Energy efficiency class ^(a) Actual water consumption in litre per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Rated capacity Energy efficiency class ^(a) Weighted remaining moisture content ^(a) (%) Spin-drying efficiency class ^(a) Spin-drying efficiency class ^(a) Programme duration ^(a) (h:min) Half 2:48 Quarter Energy efficiency class ^(a) Spin-drying efficiency class ^(a) Spin-drying efficiency class ^(a) Airborne acoustical noise emission class ^(a) (spinning phase) Pasign type Free emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Off-mode (W) (if applicable) 3:00 Networked standby (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during	60	
Washing efficiency index ^(a) Energy consumption in kWh per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual energy consumption will depend on how the appliance is used. Maximum temperature inside the treated textile ^(a) (°C) Spin speed ^(a) (rpm) Programme duration ^(a) (h:min) Programme duration ^(a) (h:min) Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Maximum duration of the guarantee offered by the supplier This product has been designed to release silver ions during Water consumption in litre per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual water consumption will depend on how the appliance is used and on the hardness of the water. Weighted remaining moisture content ^(a) (%) Weighted remaining moisture content ^(a) (%) Spin-drying efficiency class ^(a) Spin-drying efficiency class ^(a) Programme duration ^(a) (h:min) Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Ogin-mode (W) (if applicable) Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Ogin-mode (W) (if applicable) Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Off-mode (W) (if applicable) Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Off-mode (W) (if applicable) Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Off-mode (W) (if applicable) Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable)	64	
Energy consumption in kWh per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual energy consumption will depend on how the appliance is used. Rated capacity 32	Α	
Energy consumption in kWh per cycle, based on the eco 40-60 programme at a combination of full and partial loads. Actual energy consumption will depend on how the appliance is used. Rated capacity 32	5.0	
Maximum temperature inside the treated textile ^(a) (°C) Quarter 25	48	
the treated textile ^(a) (°C) Quarter 25 Rated capacity 1400 Half 1400 Quarter 1400 Rated capacity 3:39 Programme duration ^(a) (h:min) Half 2:48 Quarter 2:29 Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Delay start (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during Content ^(a) (%) Spin-drying efficiency class ^(a) Airborne acoustical noise emission class ^(a) (spinning phase) Airborne acoustical noise emission class ^(a) (spinning phase) Neight (Airborne acoustical noise emission class ^(a) (spinning phase) Neight (Airborne acoustical noise emission class ^(a) (spinning phase) Neight (Airborne acoustical noise emission class ^(a) (spinning phase) Standby mode (W) (if applicable) Networked standby (W) (if applicable) Networked standby (W) (if applicable)		
Quarter 25 Rated capacity 1400 Spin-drying efficiency class(a)	53.9 %	
Spin speed ^(a) (rpm) Half Quarter 1400 Rated capacity 3:39 Programme duration ^(a) (h:min) Half 2:48 Quarter 2:29 Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Delay start (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during Programme duration of the guarantee offered by the supplier Spin-drying efficiency class ^(a) Airborne acoustical noise emission class ^(a) (spinning phase) Airborne acoustical noise emission class ^(a) (spinning phase) Networked (W) (if applicable) 24 months		
Programme duration ^(a) (h:min) Rated capacity 3:39 Half 2:48 Quarter 2:29 Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Delay start (W) (if applicable) Minimum duration of the guarantee offered by the supplier Presentation Airborne acoustical noise emission class ^(a) (spinning phase) Airborne acoustical noise emission class ^(a) (spinning phase) Standby mode (W) (if applicable) Networked standby (W) (if applicable) Airborne acoustical noise emission class ^(a) (spinning phase) Standby mode (W) (if applicable) Networked standby (W) (if applicable) Airborne acoustical noise emission class ^(a) (spinning phase) Standby mode (W) (if applicable)		
Programme duration ^(a) (h:min) Half Quarter 2:29 Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Delay start (W) (if applicable) Minimum duration of the guarantee offered by the supplier Rated capacity 3:39 Design type Free Airborne acoustical noise emission class ^(a) (spinning phase) Standby mode (W) (if applicable) Networked standby (W) (if applicable) 24 months This product has been designed to release silver ions during	В	
Programme duration ^(a) (h:min) Half Quarter 2:29 Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Delay start (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during Design type Free Airborne acoustical noise emission class ^(a) (spinning phase) Standby mode (W) (if applicable) Networked standby (W) (if applicable) 24 months		
Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Delay start (W) (if applicable) Minimum duration of the guarantee offered by the supplier Quarter 2:29 Airborne acoustical noise emission class ^(a) (spinning phase) Standby mode (W) (if applicable) Networked standby (W) (if applicable) 24 months No		
Airborne acoustical noise emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Delay start (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during Airborne acoustical noise emission class ^(a) (spinning phase) Standby mode (W) (if applicable) Networked standby (W) (if applicable) 24 months	Free-standing	
emission class ^(a) (spinning phase) Off-mode (W) (if applicable) Delay start (W) (if applicable) Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during remission class ^(a) (spinning phase) Standby mode (W) (if applicable) Networked standby (W) (if applicable) 24 months		
Delay start (W) (if applicable) 3.00 Networked standby (W) (if applicable) Minimum duration of the guarantee offered by the supplier 24 months This product has been designed to release silver ions during	A	
Minimum duration of the guarantee offered by the supplier This product has been designed to release silver ions during 24 months	-	
This product has been designed to release silver ions during no	0.60	
the washing cycle
