ProCare Shine 10 MA

Detergents

Application
Liquid concentrate, mildly alkaline For automatic machine cleaning in commercial dishwashers with both fresh water and tank wash systems.

Product properties
- Universal cleaning agent with good cleaning performance for light soiling
- Prevents limescale and protects load items
- Protects against corrosion
- Low hazardous substance classification, low protective measures when handling
- Protects decor
- Does not contain phosphates or active chlorine

Use and dispensing
ProCare Shine 10 MA is designed for use in programme sequences in Miele Professional commercial dishwashers.

- Precise and economic dispensing via dispensing pump
- Dispensing recommendation: 2–5 ml/l (0.2–0.5 %)
- Recommended water hardness level: 0–0.5 mmol/l (0–3 °dH)

The dispensing quantity and programme must be selected based on the load items and the degree of soiling. Selecting the wrong programme or using too much or too little detergent can lead to unsatisfactory cleaning results. Based on the dishwasher's factory default settings (for Miele machines, this is usually 0.3 %), adjustments can be made as needed.

When washing, it is recommended to use soft water with a hardness of 0–0.5 mmol/l (0–3 °dH). Higher water hardness levels up to a maximum of 1.4 mmol/l (8 °dH) can, if necessary, be compensated for by increasing the dispensing concentration. However, to protect the dishwasher and the load items, we recommend using a water treatment system (e.g. an internal or external water softener) to achieve the target water hardness.

Please note:
- Do not blend in concentrated form with other products
- The dispensing system must be cleaned before switching products: rinse thoroughly with water and prime the system
- Operating instructions for Miele Professional dishwashers must be observed.
- For best results, we recommend using the complete ProCare Shine system, comprising detergent, rinse aid and reactivation salt

Technical data
Density (20 °C): approx. 1.3 g/cm³
pH value of solution: 10.0–11.0

Ingredients
Alkalines, complexing agents

ProCare
Shine 10 MA

Detergents

Storage
- Storage temperature: –7 °C to 40 °C
- No shelf life restrictions if correctly stored.
- Protect from direct sunlight

Risks and safety instructions
For safety and environmental information, see the safety data sheets. These are available from the Miele websites listed below. If used as instructed, the product is safe in respect to relevant guidelines on food processing.
Dispose of containers only when completely empty and sealed. See safety data sheet regarding disposal of residuals.
