ProCare
Shine 11 OB

Detergents

Application
Powder, mildly alkaline. For machine cleaning in commercial dishwashers with a fresh-water system.

Product properties
- Removes stubborn soiling such as starch, egg white, tea/coffee
- Prevents limescale and protects load items
- Protects against corrosion
- Does not contain active chlorine

Use and dispensing
ProCare Shine 11 OB is designed for use in programme sequences in Miele Professional commercial dishwashers.

- Manual dispensing into the door dispenser before each wash cycle
- Dispensing recommendation: 20–25 g per wash cycle (the measuring spoon supplied with the 6 kg pack, when filled to the brim, corresponds to approx. 20 g) or 2–5 g/l
- Recommended water hardness level: 0–0.5 mmol/l (0–3 °dH)

The dispensing quantity and programme must be selected based on the load items and the degree of soiling. Selecting the wrong programme or using too much or too little detergent can lead to unsatisfactory cleaning results.

Please note:
- Do not mix with other products
- Operating instructions for Miele Professional dishwashers must be observed.
- For best results, we recommend using the complete ProCare Shine system, comprising detergent, rinse aid and reactivation salt

Technical data
- Density (20 °C): approx. 1.2 g/cm³
- pH value of solution: 11.0–11.5

Ingredients
Alkalis, complexing agents, active oxygen-based bleaching agents

Shine 11 OB

Detergents

Storage
- Close lid after use.
- Store in a dry place.
- No shelf life restrictions if correctly stored.

Risks and safety instructions
For safety and environmental information, see the safety data sheets. These are available from the Miele websites listed below. If used as instructed, the product is safe in respect to relevant guidelines on food processing.
Dispose of containers only when completely empty and sealed. See safety data sheet regarding disposal of residuals.

All information contained in this leaflet is current and correct to our knowledge and experience.
This does not however release users from the obligation of conducting their own checks and tests. A legally binding assurance of specific product properties cannot be inferred from this.
