

ProCare Lab 10 AP - 10 l

Liquid detergent, alkaline, 10 l

For optimum reprocessing of laboratory utensils.

- Free from tensides, phosphorus compounds, and oxidation agents
- Specially developed for Miele Professional
- Suitable for all types of materials
- pH value 12.3-12.5

EAN: 4002515660713 / Material number: 10265640 / Old Material Number: 62924201EU1

| Product classification                        |  |
|---|--|
| Glassware Washers, laboratory                 | •                                      |
| Applications                                  |  |
| Removal of low-viscosity oils                 | Good                                   |
| Removal of inorganic and organic soiling      | Good                                   |
| Removal of stubborn or dried-on residues      | Good                                   |
| Dispensing recommendation                     |  |
| Dispensing recommendation per rinse           | 2-4 ml/l (0.2-0.4%)                    |
| pH value of solution                          | 12.3-12.5                              |
| Main applications                             |  |
| Medical laboratories                          | •                                      |
| Biological laboratories                       | •                                      |
| Microbiological laboratories                  | •                                      |
| Chemical laboratories                         | •                                      |
| Water laboratories                            | •                                      |
| Laboratories for the food industry            | •                                      |
| Laboratories for the cosmetics industry       | •                                      |
| Laboratories for the mineral oil industry     | •                                      |
| Phosphate industry                            | •                                      |
| Laboratories for the pharmaceutical industry  | •                                      |
| Product characteristics                       |  |
| Medium type                                   | Alkaline cleaning agent                |
| Aggregate form                                | Liquid                                 |
| Ingredients                                   | Alkali hydroxide, Polycarboxylate      |
| Suitable for plastic                          | •                                      |
| Suitable for stainless steel                  | •                                      |
| Suitable for laboratory glassware             | •                                      |
| Suitable for ceramics                         | •                                      |
| Not suitable for anodized aluminum            | •                                      |
| Does not contain oxidants                     | •                                      |
| Does not contain phosphates                   | •                                      |
| Does not contain surfactants                  | •                                      |
| Oxidizing effect                              | •                                      |
| Not suitable for light alloys                 | •                                      |
| Not suitable for non-anodized aluminum        | •                                      |
| Not suitable for light and non-ferrous metals | •                                      |
