

Hygiene tips

on the use of fresh water dishwashers

- Remove coarse soil from the load
- Select a suitable programme for the degree of soiling and type of load and dispense accordingly
- If necessary, select a cycle for hygienic reprocessing, e.g. 'Hygiene'
- Make use of automatic dispensing for optimum cleaning results
- Where available, use the optional drying at the end of the cycle
- Wash your hands before removing loads
- Ensure that the machine is cleaned regularly, including the sides of the door, and check that spray arms rotate freely
