

## Hygiene tips

### on the use of tank dishwashers

- Remove coarse soil from the load
- Select a suitable programme for the degree of soiling and type of load and dispense accordingly
- Make use of automatic dispensing for optimum cleaning results
- Wash your hands before removing loads
- Wear gloves and always use a clean, dry tea-towel if it is necessary to polish load items
- Never place damp crockery in cupboards or on shelves
- Replace the water in the tank several times a day
- Ensure that the machine is cleaned regularly (filters, gaskets, runners) and check that spray arms rotate freely
