WetCare

The Original Wet Cleaning System
for Outerwear.

Miele Professional. Immer Besser.

Caring for Our Customers
With the **Most Reliable** and **Sustainable** Solutions.

With Miele Professional, you are choosing reliable solutions that stand for quality and longevity.

As a family company now run by its fourth generation, Miele remains true to its responsibility to its products and processes, its employees and business partners and towards conserving our natural resources. This is reflected in the materials we choose as well as in the design and production of our machines. All of our customers benefit from innovations 'Made in Germany' which set standards throughout the industry as well as from award winning product design for ergonomics and functionality, all benefiting from low consumption and running costs.

You have the reassurance that Miele Professional develops the best and most inspiring solutions for our customers. Our guiding principle of 'Immer Besser' has been at our core for the last 125 years, and continues to be at the heart of what we do, ensuring reliability and quality for all of our solutions.

Our Pledges for the Planet

The race to save our only planet is ever-accelerating. Our commitment to evolve our ambitions is too. With these pledges, we intend to continue along the path we have already embarked on:

Make sustainability happen at every step

We continuously work towards making sustainability essential at every stage of our products' and services' life cycle – as well as in all of our value chains, and in the homes and businesses of our customers.

Make machines that won't leave a mark

Miele is dedicated to producing the best possible products and services with the least impact on the environment, with the ultimate aim to make them 100% carbon-neutral.

End waste by giving our machines new life

We are working towards creating a circular value chain with net-zero waste for all materials used in our machines to re-enter the loop at the end of their lifecycle.

WetCare —

A Sustainability Success Story

WetCare®

Over 30 years ago, Miele joined forces with Kreussler to introduce the original WetCare wet cleaning system for the gentle and environmentally friendly cleaning of delicate outerwear. In close dialogue with users and textile designers, the system has since been continuously developed and fine-tuned to meet the requirements of professional textile cleaning. Today, it is clear that wet cleaning offers laundries many tangible benefits – all the more so as the proportion of textiles suitable for wet cleaning is constantly increasing.

Milestones

- 1991 Presentation of the system
- 1993 Hessian Innovation Award for the Miele System Kreussler wet cleaning process
- 1997 First freely programmable control unit PROFITRONIC
- 2000 Cleaning programmes for hand-washable wool and silk
- 2004 Freely programmable control unit PROFITRONIC M
- 2004 AIR RECYCLING PLUS system for dryers
- 2005 Patented Miele SCHONTROMMEL in large-volume washing machines
- 2021 Product launch of the new generation of 12–20 kg Benchmark Machines
- 2023 Product launch of the 9–11 kg Benchmark Machines

WetCare — The Efficient Complete System

Miele Professional offers a complete WetCare system with perfectly harmonised components: High-performance washing machines and dryers with WetCare programmes, the patented Miele honeycomb drum and freely programmable controls including operating data acquisition, as well as finishing appliances, a wide range of laundry accessories, the excellent Miele customer service and a variety of services for professional users.

Innovation through research

WetCare is the result of intensive research into the gentle cleaning of swellable natural fibres in water using a greatly reduced mechanical action. This work was triggered by the knowledge of the unfavourable influence of halogenated hydrocarbons on the environment and health. WetCare is now available in Miele Professional washing machines from the Little Giants series upwards and also offers important economic benefits for professional textile care.

The plus for dry cleaning

WetCare gives laundry a pleasantly fresh fragrance. The original wet cleaning system also has exclusive advantages in terms of health, environmental, emission and occupational safety and also fulfils all the requirements of the 'Blue Angel' environmental label. A strong signal that is appreciated by customers, guests in the hotel industry and residents in retirement homes.

WetCare —

Gentle Care for Delicate Textiles

This is WetCare

Miele WetCare combines outstanding innovations and technology made in Germany in a unique cleaning system. The delicate laundry is subjected to short squeezing pulses alternating with extended relaxation pauses in the patented Miele honeycomb drum, gliding on a fine film of water. This gentle movement increases the shape retention and durability of the laundry, while its small openings prevent the risk of thread pulling.

With WetCare, textiles made from delicate fibres can be cleaned thoroughly and gently:

- Natural fibres such as angora, cotton, cashmere, linen, silk, virgin wool: e.g. trousers, shirts, skirts, blouses, dresses
- Synthetic fibres such as viscose and acetate: e.g. curtains, coats, costumes
- Synthetic fibres such as acrylic, polyester, Sympatex, Goretex: z. e.g. sports and functional clothing, protective clothing
- Leather clothing
- Feather and down duvets

Advantages of Miele WetCare compared to dry cleaning	
Solvent	• Water instead of halogenated/long-chain hydrocarbons
Chemical properties	• Detergent: almost completely biodegradable
Odour of the textiles/ Laundry air	• Pleasantly fresh
Soil removal	• Effective against water-soluble soiling (e.g. road dirt, urine, salts)
Technical effort	• Standard laundry machines from Miele Professional with WetCare programmes instead of expensive special machines
Environmental protection	• Uncomplicated municipal wastewater • No stricter requirements for labour and immission control • No disposal of distillation residues
Investment of resources	• Low wash temperatures • No energy and cooling water consumption for distillation of solvent • Low detergent consumption: approx. 12 g per kg of textiles

WetCare — Perfect for Your Application

Dry cleaners

Commercial dry cleaners benefit particularly strongly from diversification of their range of services, e.g. through a fast service for special textiles. Communicating the outstanding environmental and health protection, for example with the help of the prestigious 'Blue Angel' label, also increases appreciation among existing and potential existing customers.

Hotel industry

Hotels can easily integrate WetCare into their in-house laundry facilities. In this way, they can, for example, offer a high-quality overnight cleaning service for even the most demanding textiles and further increase the satisfaction of their guests. At the same time, this optimises the capacity and efficiency of the in-house laundry.

Residential and care homes

More and more care homes are using WetCare to clean residents' unproblematic outerwear in-house – without having to go through an external service provider. The residents' valuable laundry, which they have grown to love over many years, is effectively protected and unpleasant odours are replaced by a pleasantly fresh fragrance.

Trade fair and event organisers, stage companies, costume hire companies

Where professional standards are applied, particularly sophisticated textiles are often used. Whereas such items used to have to be dry-cleaned, they can now be cared for cost-effectively and as required in-house with WetCare.

The international textile care labelling according to DIN EN ISO 3758 categorises professional wet cleaning the care label W in a circle.

Dispensing Pumps

For the **WetCare** Application

Miele Professional offers the perfect solution for convenient, automatic detergent dispensing. The modern dosing technology portfolio includes peristaltic squeeze pumps and diaphragm pumps with high delivery rates for washing machines of all sizes. Features such as easy installation and a wide range of accessories make the dispensing pumps indispensable in WetCare applications.

Peristaltic pumps

With their proven technology, the precise peristaltic pumps fulfil all common requirements.

Membrane pumps

The particularly low-maintenance diaphragm pumps are characterised by their fast and high dosing performance.

Dosing pump	DOS-GP3	APMW 051	APMW 045
Pump type	Peristaltic pumps without integrated controls	Peristaltic pumps	Membrane pumps
Dosing capacity for washing machines with load capacity [kg]	up to 166 ml/min 6–15	up to 285 ml/min 6–32	up to 1.000 ml/min 14–32
Installation kit (included in the scope of delivery)	Stainless steel pump housing for 3 dispensing pumps, hose and suction lance ready installed	Fastening material, crimp hoses, quick coupling and pre-assembled cable harness	Fastening material and pre-assembled wiring harness
Pump kits	1, 2 or 3 pumps	2, 4 or 6 pumps	1–6 pumps*

All pumps are particularly easy to connect via the Miele XCI-Box or Connector Box and can be flexibly extended thanks to their modular design. Dosing lances in various lengths and diameters are also available, as well as acoustic/optical empty level warning devices.

* Can also be combined with peristaltic squeeze pump APWM 053

Washing Machines and Dryers for the **WetCare** Application

PERFORMANCE PLUS

Little Giants/Performance Plus
Load capacity 6–8 kg/M Touch Flex controls

Ideal sizes for every application

- Variants for 6, 7 and 8 kg load capacity
- Wide range of programmes and intuitive touch controls
- Digital connection option

Washing machine	PWM 906	PWM 907	PWM 908
Controls	M Touch Flex	M Touch Flex	M Touch Flex
Load capacity [kg]	6	7	8
Honeycomb drum, drum volume [l]	57	64	73
Max. spin speed [U/min]	1.600	1.600	1.600
g factor/residual moisture* [%]	704/48	704/48	704/48
Running time** [min]	49	49	49
External dimensions H/W/D [mm]	850/596/714	850/596/714	850/596/714

* Residual moisture information based on hot rinse in the last rinse cycle, ** Running time in the coloured wash 60 °C programme, warm water connection

Washing Machines

for the **WetCare** Application

PERFORMANCE -PLUS

Benchmark Machines/Performance Plus Load capacity 9–11 kg/M Touch Pro controls

- Intuitive programme operation via full-touch colour display
- Wide and differentiated range of programmes, fully customisable
- Integrated disinfection programmes
- Display of all information in local language, 31 languages selectable

Washing machine	PWM 909	PDW 909
Controls	M Touch Pro Plus	M Touch Pro Plus
Load capacity 1:9 [kg]	9	9
Honeycomb drum, drum volume [l]	80	80
Max. spin speed [U/min]	1.300	1.300
g factor/residual moisture* [%]	520/44	520/44
Running time** [min]	45	45

360PRO – The Holistic and Sustainable Solution for All Your Business Needs

You can rely on our unrivalled support when it comes to all of your reprocessing needs through our tried and tested holistic solutions. Miele Professional provides you with inspiring solutions to meet the many demands of your business. From planning, through to calculation, and up to implementation and maintenance, we ensure that you can fully focus on your daily work, all with total peace of mind. **We call this 360PRO.**

Service Solutions You Can Depend On

Our service is called PROtect and combines comprehensive services, maximum budget control and a smooth supply of spare parts. Our specially trained technicians carry out service work in accordance with Miele's own and legal requirements and take care of the technical documentation. This ensures process reliability and the long-term value retention of your machines. We provide you with transparent and industry-specific advice, coordinate appointments and guarantee availability of suitable spare parts – even 15 years after series discontinuation. Our comprehensive service network protects your machines and your business, so that you have nothing to worry about.

More information about PROtect:
www.miele.xy/pro/protect

Please adapt QR Code to local needs

Miele MOVE. Your Digital Solution for Efficient Machine, Data and Process Management.

Intuitive, transparent, efficient. Miele MOVE connects commercial machines, optimises processes and makes your day-to-day work easier. Our digital products offer you convenient user interfaces with intelligent assistance tools. Optimisation has never been simpler. We support you with digitalisation and are happy to advise you.
