

Miele

You Protect Lives. We Protect Your Equipment.

Miele Professional. Immer Besser.

360 PRO

“

For my team and me, reprocessing our equipment before every new job is extremely important — this is where the high quality of Miele **360PRO** plays a decisive role and gives us the necessary safety for our work!

”

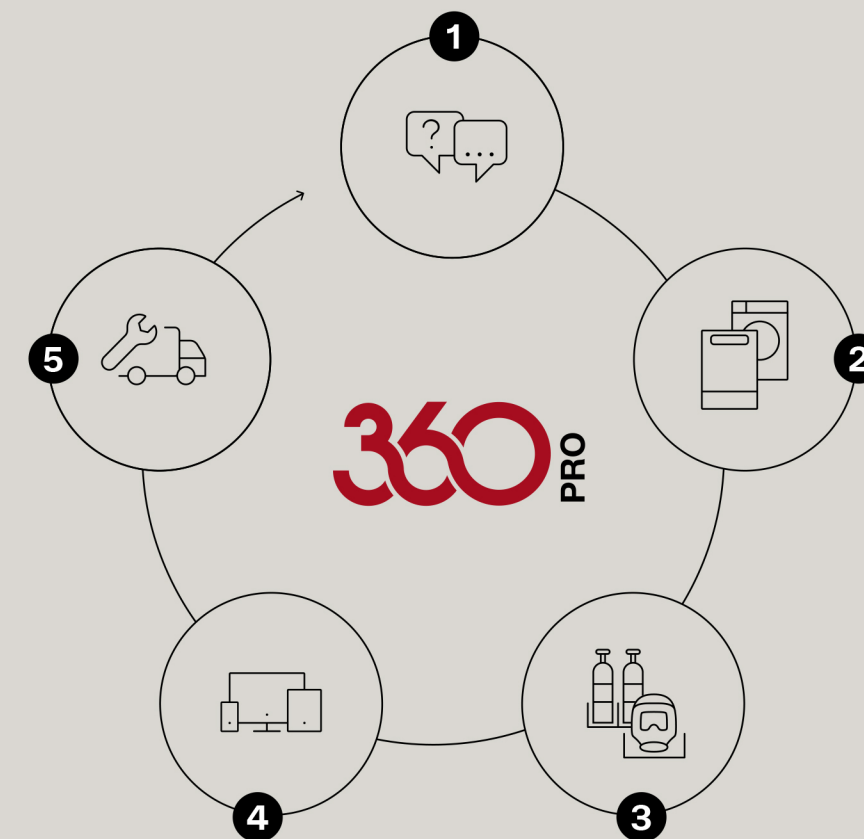

Miele 360PRO. The Best Protection for Every Equipment.

We understand the challenges and dangers that fire brigades and other emergency services face every day. And we offer 360PRO: our holistic commercial system for the reprocessing of protective equipment. We are there for you so that your team can concentrate on the next mission quickly and contamination-free with reprocessed protective equipment.

Miele

1 Consulting

Would you like to reprocess personal protective equipment of any kind yourself? We can advise you on the best possible equipment for your fire brigade.

4 Digital Solutions

Connected machines, optimised processes and direct service support – Miele MOVE ensures transparency and efficiency in your work processes.

2 Machines

We have the right reprocessing solution for you for protective clothing, breathing apparatus, anaesthesia equipment, helmets, gloves, harness systems and suitable machines for your team kitchen and team rooms.

5 Service

Whether advice on application technology, repairs or annual maintenance – our national network of Approved Partners are always within reach and work towards ensuring that your machines are always ready when you are!

3 Accessories

We have accessories available to make your team's daily work more convenient and to enable you to prepare all equipment quickly and easily yourself.

Safely Reprocessed Equipment for Every Application With Miele 360PRO.

Our 360PRO system solution enables economical reprocessing directly on site at your fire brigade. Our high-performance machines, processes and accessory components have been and continue to be developed in close cooperation with renowned equipment manufacturers and experienced experts from the field. The result is safe reprocessing of PPE with the best possible functional preservation and optimum material protection. You can clean, decontaminate, proof and dry your PPE in next to no time. In addition, the simple selection of different languages makes it easy for almost anyone to use the machines.

Jacket & Pants

Requirement:

High-performance process technology and specialised washing and drying programmes with coordinated parameters.

Our solutions:

Washing machines, dryers, drying cabinets

Gloves

Requirement:

Ensure thorough cleaning with a specially developed wash programme with low temperatures, low drum rotation and very low spin speed.

Our solutions:

Washing machines, drying cabinets

Compressed air cylinder

Requirement:

Carefully coordinated programmes ensure thorough cleaning and, if necessary, disinfection. Customised inserts reliably position compressed air breathing apparatus carrier frames and compressed air cylinders.

Our solutions for the compressed air cylinder:

Washer-disinfectors, drying cabinets

Our solutions for the carrying frame:

Freshwater dishwashers, washer-disinfectors, drying cabinets

Helmet

Requirement:

Firefighter helmets must be cleaned using a special wash programme that involves only a minimum drum rotation and a high water level.

Our solutions:

Washing machines, dryers, drying cabinets

Air regulator

Requirement:

Air regulators must be reliably positioned in the wash cabinet with the appropriate inserts. Before reprocessing, the regulators are also pressurised with compressed air to prevent the ingress of liquid.

Our solutions:

Freshwater dishwashers, drying cabinets

Breathing mask

Requirement:

The various masks are thoroughly cleaned and safely disinfected.

Our solutions:

Washing machines, fresh water dishwashers, washer-disinfectors, dryers, drying cabinets

Always by Your Side.

Whether in the volunteer or professional fire brigade, in rural areas or in the big city – people who work for the well-being of others every day deserve the best protection themselves.

And Miele 360PRO is the right partner for this - we can advise you on the best possible equipment for your fire brigade and work with you to find the right reprocessing solution for uniforms, breathing apparatus, anaesthetic equipment, helmets, gloves, harness systems and suitable appliances for your team kitchen and crew rooms.

In addition to fire brigades, we also support other areas in the professional reprocessing of uniforms and equipment.

Your New Team Members.

Our **360PRO** system solution enables economical preparation directly on site at the fire brigade. You can clean, decontaminate, proof and dry your equipment in the shortest possible time.

Simply scan the QR code and discover the right machines from Miele Professional.

Gentle drying in our **drying cabinet**.

Our **washing machines** are equipped for your needs as standard and are also available for clean/unclean separation.

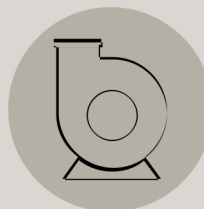

Fresh water dishwasher with specially designed programmes.

Effective **tumble dryers** for the best results.

Washer-disinfectors for reliable hygiene with high process reliability.

Technical relief organisations

Whether it's workwear or uniforms. The different materials require customised care. Our machines are ideally suited for fast, resource-saving and hygienic cleaning.

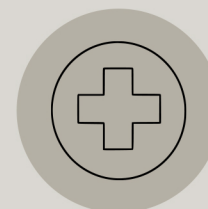

Armed Forces

After operations or exercises, a thorough cleaning of uniforms and equipment is a prerequisite for the next challenge. Our special accessories can be configured as required and therefore fulfil the highest demands.

Police

As different as the tasks are, as demanding is the cleaning of the individual garments. Fast and gentle cleaning of uniforms and equipment is guaranteed with our machines.

Rescue service

Contamination-free equipment that is optimally prepared for use – thanks to automated reprocessing with our machines. This process also increases patient safety for anaesthesia equipment.

Protection Deserves the Best Service.

Repairs and spare parts

Our aim is always to rectify any failures as quickly as possible. We are there for you, coordinate appointments and guarantee the availability of suitable spare parts – even 15 years after series discontinuation.

Our Approved Partner Network

We have 28 approved and official Miele partners with over 200 qualified service engineers covering all corners of the UK. Our Approved Partners have a wealth of expertise and experience in designing, installing and servicing Miele equipment so you know you're in good hands right from the start, and beyond.

Regular service

Regular preventive maintenance is essential to avoid malfunctions in the first place. Choose one of our routine options and benefit from long-term protection for your machines.

Inspections and maintenance

Regular checks of the process parameters increase operational reliability and ensure a high standard of your cleaning results. We will also be happy to advise you on how to optimise machine maintenance.

Our service is called PROtect.

PROtect combines comprehensive services, maximum budget control and a smooth supply of spare parts. Our professional team carries out service work quickly and reliably and ensures optimum installation and constant operational readiness.
