

Hospitality

Hotels, Motels, Bed & Breakfast, Inns, etc.

Miele's commercial laundry systems help hotels save on energy, water, and linen replacement costs—without compromising quality. Our high-capacity washers deliver faster turnaround, reduced reclaim, and extended linen life, cutting utility bills while supporting 5-star guest satisfaction with consistently fresh, clean linens.

Stop Discarding Linens!

Improve workflow with fast cycle times, and increased throughput.

Reduce the number of linens and towels replacements.

Cut long-term costs by reducing water, electricity, and detergent use.

Tailored programs for the hospitality industry.

Sustainable solutions for internally managed operations.

Tested for 30,000 Operating Hours.

Before & After

Garments washed in competitor drum left with stain need to be discarded. Samples were then washed in a Miele washer and salvaged to look pristine and usable.

Cost-Effective: Tailored programs use less detergent, water, and time, helping to reduce costs while extending the life of your linens and minimizing the need for frequent replacements.

Fabric Care: Preserves the quality and integrity of fabrics, ensuring they remain in great condition after every wash for longer-lasting results.

“Aggressive on the clean, gentle on fabrics.”

Miele's Honeycomb Drum provides a gentle yet thorough clean. Its patented design minimizes mechanical stress on fabrics, extending lifespan by up to three times.

Competitor drums can prematurely break down fibers, reducing the lifespan of fabrics and leading to more frequent replacements.

Choosing the load.
