

Miele

Glasses, Plates And Cutlery
Spotless In Only 24 Minutes

Fast, clean dishware:
The new ProfiLine generation.

Miele Professional. Immer Besser.

Perfect results in the shortest of times.

Performance for professionals. Convenience familiar from your own home.

Today's world is moving fast – making one resource increasingly valuable: time. Our daily schedules are tightly packed and the demands on our time are enormous.

The new ProfiLine dishwashers were developed to meet the challenges of commercial use – and combine technology from the latest Miele Professional machines with the convenience and design of our flagship domestic models. With an intuitive user interface, smart features and 8 programs with short cycle times, our new ProfiLine dishwashers ensure that impeccably clean dishware is ready for use again quickly.

Miele ProfiLine gives you a head start with your dishwashing – and, above all:
Time.

The new ProfiLine.

Fast, versatile, durable.

24-minute cycle time

for rapid turnaround and a cleaner kitchen.

Durable components

for up to 5 cycles per day and 12,500 total cycles.

Versatile baskets

for simple loading and a large volume of dishware.

Intuitive interface

for fast, simple and convenient operation.

Selectable final rinse temperatures

for anti-viral cleaning and the highest of hygiene standards.

Fast dishware turnaround
**for offices, businesses, schools
and private homes.**

***Offices and agencies –
nurseries and schools –
Large private households.***

For environments with large volumes of dishware to process and little time to spare.

With ProfiLine, dishware is ready for use again in a matter of minutes: The new dishwashers are designed to withstand the rigours of continuous commercial use, while still offering users the convenience of high-end domestic appliances. ProfiLine represents the perfect stepping stone into the world of commercial dish care – for all working environments with large volumes of dishware to process and little time to spare.

Convenient functions

In the blink of an eye.

24-minute cycle time

With their impressively short cycle times lasting 24 minutes, ProfiLine models are 3 times faster than domestic dishwashers. This means that clean dishware is ready for use again in next to no time – leaving your kitchen tidy and uncluttered.

Exemplary hygiene

Special 'SaniWash' program achieve temperatures of 180°F | 82°C. Final rinse temperatures for selected programs can also be increased for even greater hygiene.

12,500 program cycles

ProfiLine dishwashers are tested under laboratory conditions to ensure that they last 12,500 typical cycles and are designed for up to 5 cycles per day.

Rugged materials

Components subject to heavy use are made from robust, durable materials which are put through stringent tests and are designed for continuous use in a commercial environment.

Smooth surfaces

The smooth surfaces of the operating elements prevent harmful soil from gathering. All surfaces are easily wiped clean, contributing to enhanced hygiene standards.

Simple connection

ProfiLine machines are Plug & Play, and instantly ready for connection. Simply connect to water supply, plug in and switch on.

Intuitive operation

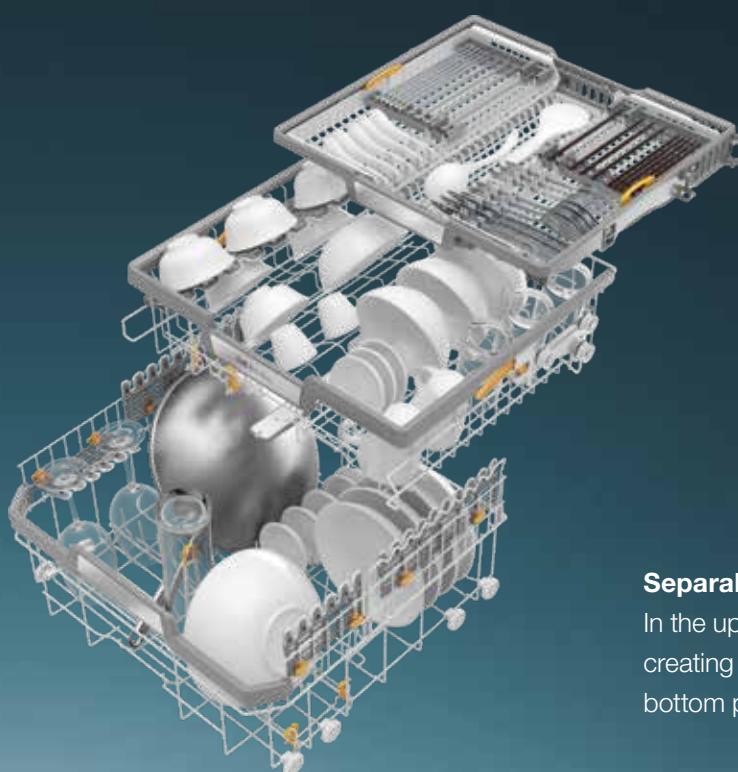

All programs use intuitive sensor controls. Self-explanatory symbols and key content in plain text speed up program selection and avoid operating errors.

Knock2open

ProfiLine dishwashers blend in seamlessly in handleless kitchens – and are opened automatically by double-tapping on the front panel.

Flexible basket design

Adjustable elements and non-slip materials allow for the flexible positioning of items and offer a secure hold for dishware and cutlery for exceptional cleaning results.

3D MultiFlex tray

Thanks to height-adjustable central and side sections, the cutlery drawer now even accommodates small dishware such as espresso cups.

FlexCare glass holder

The hinged glass holders with their soft silicone liners afford the best possible protection to stemware.

Separable row of spikes for bowls

In the upper basket, every second spike is hinged, creating more space to perfectly accommodate more bottom plates and bowls.

Which ProfiLine is right for you?

PFD 101U

Undercounter unit with stainless steel front and AutoOpen

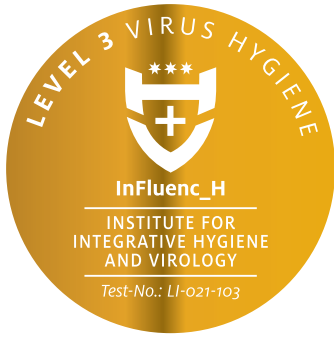

PFD 102i

Integrated unit with AutoOpen and BrilliantLight

PFD 104 SCVi

Fully integrated unit with large chamber, AutoOpen, AutoClose, Knock2open and BrilliantLight

Effective against viruses – scientifically proven*

*According to certificates issued by the Institute for Integrative Hygiene and Virology with respect to the removal of enveloped and non-enveloped viruses (e.g. Coronavirus or influenza) in the 'SaniWash' and 'Pots&Pans' programs and the removal of enveloped viruses, including Noro- and Adeno viruses in the 'QuickIntenseWash' and 'Universal' programs. In both cases using Miele ProCare Shine 11OB and 12GC.

Miele ProfiLine dishwashers
**remove more than
99.9% of viruses.***
