

Miele

Glasses Plates And Cutlery **Spotlessly Clean In Only 28 minutes**

Super fast, super clean crockery:
The new ProfiLine generation with a cycle time of only 28 minutes.

Miele Professional. Immer Besser.

Perfect results

in the shortest of times

Performance for professionals.

Today's world is moving fast – making one resource increasingly valuable: time. Our daily schedules are tightly packed and the demands on our time are enormous.

The new ProfiLine dishwashers were developed to meet the challenges of commercial use – and combine technology from the latest Miele Professional appliances with the convenience and design of our flagship domestic models. An intuitive user interface, smart features and 8 programmes with short cycle times ensure that impeccably clean crockery is ready for use again in next to no time.

Miele ProfiLine gives you a head start with your dishwashing – and, above all, frees up:

Time.

The new ProfiLine

Fast, versatile, durable

28-minute cycle time

for rapid turnaround and a cleaner kitchen.

Durable components

for up to 5 cycles per day and 12,500 total cycles, compared to a domestic dishwasher which is tested for 5,600 programme cycles.

Selectable final rinse temperatures

for anti-viral cleaning and the highest of hygiene standards.

Versatile baskets

for simple loading and large amounts of crockery.

Intuitive interface

for fast, simple and convenient operation.

Fast crockery turnaround

for any type of business

**Offices, Aged Care,
Healthcare, Childcare,
Schools**

In a hectic working day, there is no time to stand around for hours, waiting for the dishwasher to finish.

With ProfiLine, crockery is ready for use again in a matter of minutes. The new dishwashers are designed to withstand the rigours of continuous commercial use, whilst still offering users the convenience of high-end domestic appliances. ProfiLine represents the perfect stepping stone into the world of commercial crockery care – for all working environments with large volumes of crockery to process and little time to spare.

Convenient functions in an instant

28-minute cycle time

With their impressively short cycle times lasting only 28 minutes, ProfiLine models are 3 times faster than domestic dishwashers. This means that clean crockery is ready for use again in next to no time – leaving your kitchen tidy and clean.

Exemplary hygiene

Special 'Intensive' and 'Hygiene' programmes with final rinse temperatures of up to 82°C, meeting Australian and International food safety standards for even greater hygiene.

12,500 programme cycles

ProfiLine dishwashers are tested under laboratory conditions to ensure that they last 12,500 typical cycles and are designed for up to 5 cycles per day.

Rugged materials

Components subject to heavy use are made from robust, durable materials which are put through stringent tests and are designed for continuous use in a commercial environment.

Smooth surfaces

The smooth surfaces of the operating elements prevent harmful soil from gathering. All surfaces are easily wiped clean, contributing to enhanced hygiene standards.

EcoFeedback

When a programme is selected, estimated water consumption values are displayed.

Simple connection

ProfiLine machines are Plug & Play and instantly ready for connection. Simply connect to a water supply, plug in and switch on.

Intuitive operation

All programmes are intuitively operated using sensor controls. Self-explanatory symbols and key content in plain text speed up programme selection and avoid operating errors.

Integrated water softener

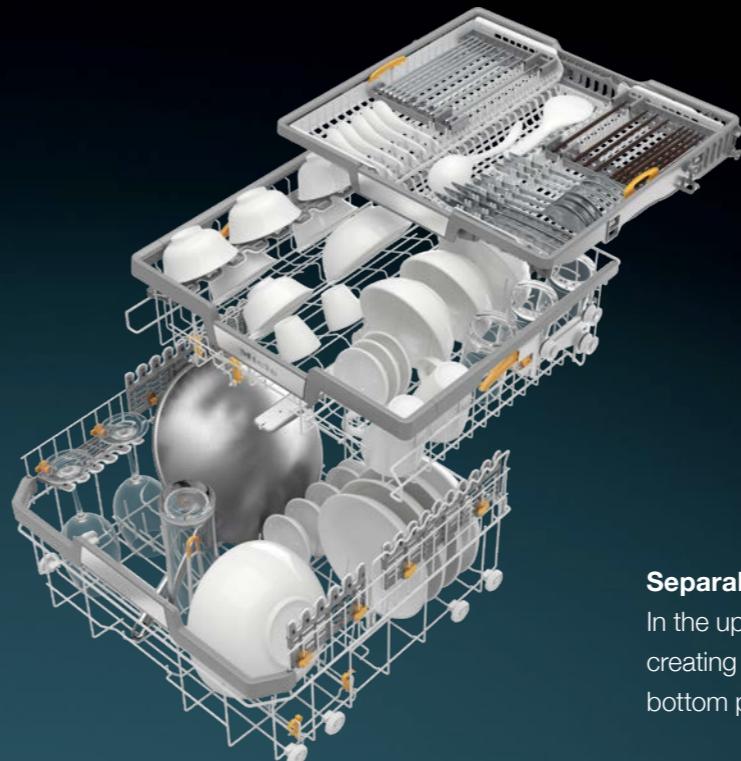

The built-in softener ensures the optimum hardness level of the water for perfect dishwashing results. The degree of water hardness is adjusted manually to suit the on-site water quality.

Knock2open

Clever: ProfiLine dishwashers blend in seamlessly in handleless kitchens – and select models open automatically by double-tapping on the front panel.

Flexible basket design

Adjustable elements and non-slip materials allow for the flexible positioning of items and offer a secure hold for crockery and cutlery for exceptional cleaning results.

3D MultiFlex tray

Thanks to height-adjustable central and side sections, the cutlery drawer now accommodates small items of crockery such as espresso cups.

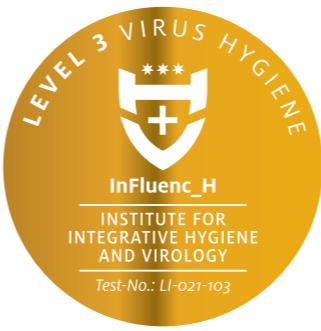

FlexCare glass holder

The hinged glass holders with their soft silicone liners offer the best possible protection to stemware.

Separable row of spikes for bowls

In the upper basket, every second spike is hinged, creating more space to perfectly accommodate more bottom plates and bowls.

Which ProfiLine is right for you?

Effective against viruses – scientifically proven*

*According to certificates issued by the Institute for Integrative Hygiene and Virology with respect to the removal of enveloped and non-enveloped viruses (e.g. Coronavirus or influenza) in the 'Hygiene' and 'Intensive' programmes and the removal of enveloped viruses, including Noro- and Adeno viruses in the 'Short' and 'Universal' programmes. In both cases using Miele ProCare Shine 11OB and 12GC.

PFD 101

Freestanding dishwasher with AutoOpen, FlexLine baskets, 4 Star WELS rating and 4 Star Energy Rating
