

Product overview:

Washing machines and tumble dryers, rotary ironers

Miele Professional. Immer Besser.

Laundry machines from Miele Professional

Never demand less

With Miele Professional, you are choosing top-class quality. This applies not only to our machines which reliably live up to expectations on a daily basis and give rise to the great trust professional users place in the Miele brand. Miele's proverbial quality goes far beyond this. As a family-run company, now in its fourth generation, our actions, as always, still stem from a sense of responsibility for our products and processes and towards our employees, business associates and the environment.

Reliability and responsibility form the bedrock of Miele's entrepreneurial activities and find expression in many different ways. Clients benefit from innovations 'Made in Germany' which set standards in the industry as well as from a product design which has received multiple awards for ergonomics and functionality, and from low running costs. Carefully matching systems from Miele Professional cover a wide range of requirements and offer the peace of mind of an efficient and award-winning service network. For you as a professional user, there is simply no reason to be satisfied with less!

Dr. Markus Miele

Executive Director and Co-Proprietor

Dr. Reinhard Zinkann

Executive Director and Co-Proprietor

Top performance for all lines of business

That's why professional users go for Miele Professional

Perfect results

Our laundry machines feature high-performance program packages to cater for channel-specific challenges, e.g. safe disinfection in the event of the outbreak of a notifiable disease. In Miele's unique honeycomb drum, even the most delicate of fabrics are given the gentlest of treatment, whilst our rotary ironers guarantee a first-class finish.

Efficient processes

Miele's proverbial quality stands for fast and smooth processes. With their high-quality, low-maintenance design, our laundry machines are the reliable workhorses in a commercial working environment. An ergonomic design makes for fast and simple operation.

Economic use of resources and improved economics

With low costs throughout a machine's entire life cycle (total cost of ownership), our long-lasting laundry machines are an investment from which you will reap ample rewards – and thanks to numerous innovations will help save valuable resources. The EcoSpeed wash rhythm, for instance, achieves excellent wash performance with a minimum of water, whilst our tumble dryers allow the use of the cheapest method of heating available on site.

A reliable contact

The right response to every question: Our laundry machines are centerpiece in a holistic solution including carefully selected accessories and a wide range of advisory and after-sales services. With Miele Professional as a reliable partner, all professional challenges can be met efficiently.

The LITTLE GIANTS

Top performance in compact form

In the compact class, washing machines and dryers from the LITTLE GIANTS range have for decades been the proven workhorses in all applications requiring fast and efficient laundry care several times a day. Installed as a washer-dryer stack on a footprint of less than 5.38 ft² | 0.5 m², LITTLE GIANTS represent the perfect comprehensive solution for a compact on-premise laundry.

Benefits that pay off on a daily basis

- Fast: Up to 20 lb | 9 kg washed in only 49 minutes
- Unambiguous: Text displays in up to 32 languages
- Interconnected: Well informed everywhere and at all times

More economical and powerful than previous version

- The washing machines require 22% less water and 28% less energy.
- Cycle times on heat-pump dryers have been cut by one-third to now less than 60 minutes.
- Whilst casing dimensions have remained unchanged, washing machines and tumble dryers now have a load capacity increased by 25%.

LITTLE GIANTS washing machines

20 lb | 9 kg load capacity / M Touch Flex controls

PERFORMANCE-PLUS

Washing machine	PWM 908
User interface	M Touch Flex
Load capacity	20 lbs / 9 kg
Drum volume	2.57 ft³ / 73 l
Max. spin speed	1600 rpm
g-factor/Residual moisture*	613/48 %
Cycle time**	49 mins.
Heating type	EL
Drainage [DP DN 22 / DV DN 70]	DP
Standard electrical connection	2AC 208-240V, 60Hz, 30A
Front color / material	SST, LW
External dimensions H/W/D	33.5/23.4/28.5 in
External dimensions H/W/D	850/595/725 mm

EL = Electric, DP = Drain pump, LW = Lotus white, enamelled, SST = Stainless steel
* Residual moisture after hot final rinse, ** Cycle time in 'Cottons 140°F | 60°C, hot water

M Touch Flex controls

- High-level user convenience through full-touch color display
- Simple and intuitive operation at the touch of a fingertip
- All information as text, 32 languages
- Extensive set of special programs as standard, e.g. for sports and hiking, hotels, WetCare, disinfection

Highlights

- Exclusive to Miele: Gentle and thorough fabric care with new patented honeycomb drum
- Very low residual moisture levels on account of high g-factor
- CapDosing for fast portion dispensing
- Installation as space-saving washer-dryer stack possible

Marine model version

- Connection options for use in shipboard/offshore applications

Optional accessories

- Dispenser modules for the automatic dispensing of liquid detergents
- XCI-Box-LG control unit for customized connectivity and connection of dispenser pumps for highly efficient liquid dispensing
- Bases for ergonomic loading and unloading

OCTOPLUS

Washing machines and dryers
17–23 lb | 8–10 kg load capacity

The technology on board the Octoplus model range is derived directly from large machines for commercial laundries. Features such as a gaiterless suspended drum unit on washing machines make these large-volume laundry machines perfectly suited to washing large batches of laundry on a daily basis.

Benefits that pay off on a daily basis

- Fast: Up to 25 lb | 10 kg washed in only 53 minutes
- Tailored to needs: Program design for simple, universal applications
- Fits anywhere: Washer-dryer stack requiring less than 6.5 ft² | 0.6 m² of floor space

OCTOPLUS washing machines

20–25 lb | 8–10 kg load capacity / Profitronic L Vario

octoplus®

Washing machine/Washer-dryer stack	PW 6080 Vario	PW 5105 Vario	PWT 6089 Vario

EL = Electric, LP = Drain pump, AV = Dump valve

* Residual moisture after hot final rinse, ** Not available in Canada, ***Cycle time in 'Cottons 140°F | 60°C, hot water

Profitronic L Vario controls

- 4 direct-access pushbuttons with jog shuttle
- Display showing all information in local language
- Safe work processes through multi-stage user interface
- Individual adjustment of dispensing

Highlights

- Exclusive to Miele: Gentle and thorough fabric care with honeycomb drum
- Safe disinfection through numerous disinfection programs, including RKI-listed programs

Highlight: PWT 6089 Vario

- Space-saving washer-dryer stack occupying less than 6.5 ft² | 0.6 m² floor space

Optional accessories

- Dispenser pump for the automatic dispensing of liquid detergents
- Bases for ergonomic loading and unloading

The BENCHMARK MACHINES

The standard for performance and efficiency

The Benchmark machines from Miele Professional meet the highest demands on laundry and textile care with ease. They also offer unique innovations and exclusive features subscribing to Miele's proverbial quality standards - naturally in combination with first-class economics and the protection of natural resources.

Benefits that pay off on a daily basis:

- Effortless: OneFingerTouch safely locks the large door at the touch of a finger
- Perfect rhythm: The EcoSpeed wash rhythm provides even faster results

Outstanding efficiency

Benchmark Machines allow you to profit from numerous innovations aimed at the highly effective use of resources. The optimized design of the outer drum alone has resulted in water consumption being cut by up to 20% and electricity consumption savings of as much as 30%.

BENCHMARK washing machines

29–45 lb | 13–20 kg load capacity / Profitronic D controls

PERFORMANCE

Washing machine	PW 413	PW 418

* Residual moisture after hot final rinse, ** Cycle time in 'Cottons 140°F | 60°C, hot water

Profitronic M controls

- 6 direct-access pushbuttons with jog shuttle
- Freely programmable controls with 199 program slots
- Large range of programs, many geared to specific applications
- Display with all information in local language, 11 languages
- Card reader

Highlights

- Simple door closure with OneFingerTouch
- Efficient use of resources thanks to modified design of suds container
- Extremely smooth running, even at high spin speeds, thanks to efficient suspension system.
- Optimum laundry care and cleaning thanks to patented honeycomb drum 2.0 with redesigned drum ribs.
- High wash performance thanks to optimized EcoSpeed wash rhythm
- Very low residual moisture levels on account of high g-factor
- High daily throughput through very short cycles

Optional accessories

- Dispenser pump for the automatic dispensing of liquid detergents
- Baseass for ergonomic loading and unloading
- Retrofittable weighing base
- Operating data acquisition

PROFITRONIC M washing machines

70 lb | 32 kg load capacity / Profitronic M controls

Washing machine	PW 6321
User interface	Profitronic M
Load capacity	70 lb / 32 kg
Drum volume	11.3 ft ³ / 320 l
Max. spin speed	1,000 rpm
g-factor/Residual moisture*	448/47 %
Cycle time**	47 mins.
Heating types	EL/D
Standard electrical connection	3AC 208V, 60Hz, 70A
Convertible to	3AC, 220-240V
Drainage [DN 70]	AV
Front color / material	Stainless steel
External dimensions H/W/D	64.6/42.8/50.1 in
External dimensions H/W/D	1,640/1,085/1,272 mm

EL = Electric, G = Gas, D ind. = Indirect steam, D dir. = Direct steam, AV = Drain valve

* Residual moisture after hot final rinse, ** Cycle time in 'Cottons 60°C, hot water

Profitronic M controls

- 6 direct-access pushbuttons with jog shuttle
- Freely programmable controls with 199 program slots
- Large range of programs, many geared to specific applications
- Display with all information in local language, 11 languages
- Card reader

Highlights

- Exclusive to Miele: Gentle and thorough fabric care with honeycomb drum
- Very low residual moisture levels on account of high g-factor
- High daily throughput through very short cycles
- Load-specific consumption through automatic weighing system

Optional accessories

- Dispenser pump for the automatic dispensing of liquid detergents
- Bases for ergonomic loading and unloading
- Operating data acquisition

Tumble dryers

18–90 lb | 8–40 kg load capacity

Miele Professional offers users of commercial dryers the largest selection of model types and heating methods on the market. These include space-saving SlimLine dryers which, thanks to their reduced width, negotiate narrow doors with ease. Alongside standard electric heating, clients can choose exceptionally low-consumption heat-pump dryers with a self-cleaning heat exchanger.

Benefits that pay off on a daily basis:

- High quality: The honeycomb drum ensures that all textiles are dried gently and uniformly.
- Precise: The PerfectDry system guarantees that fabrics are dried perfectly to the desired degree of drying
- Fast and economical: With the patented Air Recycling Plus process, around 60% of process heat is recuperated

More on heat-pump dryers with the patented StreamClean self-cleaning system is available on Miele Professional's YouTube channel.

LITTLE GIANTS dryers

18 lb | 8 kg load capacity / M Touch Flex controls

PERFORMANCE-PLUS

Tumble dryers	PDR 908 EL	PDR 908 HP

M Touch Flex controls

- High-level user convenience through full-touch color display
- Simple and intuitive operation at the touch of a fingertip
- All information as text, 32 languages
- Extensive set of special programs as standard, e.g. for sports, home furnishings, WetCare, flatwork

Highlights

- Exclusive to Miele: Gentle and uniform drying with new patented honeycomb drum
- Spot-on drying results thanks to patented PerfectDry system
- Time savings and convenience thanks to large-surface lint filter
- High efficiency through maintenance-free, energy-saving drive motor
- Installation as space-saving washer-dryer stack possible

Highlights: Heat-pump dryers

- Flexible installation without the need for vent ducting
- Energy Star and EnerGuide rating
Up to 60% energy savings compared with a conventional condenser dryer

Marine model version

- Connection options for use in shipboard/offshore applications

Optional accessories

- Bases for ergonomic loading and unloading

OCTOPLUS dryers

Rotary ironers

Working widths 32.5–65" | 830–1,680 mm

The feel-good factor offered by well-laundered bed linen, glossy tablecloths and serviettes – perfectly finished textiles – is a true reflection of the quality of hotels, restaurants and homes. Clients placing as much store by the finish of their laundry as on cleanliness can rest assured that guests, visitors and residents will feel at home.

Benefits that pay off on a daily basis:

- Convenient: The freely positionable FlexControl footswitch allows particularly flexible control of the ironer
- High-value: The patented EasyFold outfeed table allows ironed textiles to cool down effectively, fixing the finish in place

Learn more about high-performance flatwork ironers on Miele Professional's YouTube channel.

HM 16 rotary ironers

Working width 32.5" | 830 mm

Rotary ironer	HM 16-80 D
Roller diameter	6 in / 160 mm
Working width	32.5 in / 830 mm
Heater plate material	Aluminum
Throughput* at 20% residual moisture	13 kg/h
Ironing speed	6.5 -15 ft/min
Heating type	EL
Standard electrical connection	2AC 208-240V, 50-60Hz, 20A
Rated load	2.9–3.8 kW
Vent connection [DN]	–
Removal of laundry	At front
External dimensions H/W/D	38/39/15 in
External dimensions H/W/D	959/985/380 mm

EL = Electric, * Figures as per DIN 11902. In practice, throughput is usually 20-40% below the quoted max. figures.
Actual throughput depends on the speed and experience of the operator, the type of laundry being ironed, the way it was sorted prior to ironing, the condition of the trough, and the standard of finish required.

Highlights: HM 16-80 D

- High-quality roller padding with polyester needle felt and ARAMID needle felt cloth
- Convenient controls with footswitch, adjustable temperature and roller speed
- Simple laundry finish with free roller end
- Steam function for efficient working and a perfect finish
- Fold-away design for simple storage on the smallest of footprints

PRI 21 rotary ironers

Working width 39–55" | 1,000–1,400 mm

Rotary ironers	PRI 210	PRI 214
Roller diameter	8 in / 210 mm	8 in / 210 mm
Working width	39 in / 1000 mm	55 in / 1400 mm
Heater plate material	Aluminum	Aluminum
Throughput* at 15% residual moisture [kg/h]	35	–
Throughput* at 25% residual moisture [kg/h]	26	33
Heating type	EL	EL
Standard electrical connection	2AC 240V 50-60Hz, 20A	3AC 240V 50-60Hz, 30A
Convertible to	2AC 220V, 2AC 208V	3AC 220V, 3AC 208V
Rated load	3.7 (3.2/2.9) kW	7.6 (6.5/5.9) kW
Vent connection [DN]	70**	70
Removal of laundry	At front	At front
External dimensions H/W/D	41/62/19 in	41/78/26 in
External dimensions H/W/D	1,032/1,579/476 mm	1,032/1,979/650 mm

EL = Electric, * Figures as per DIN 11902. In practice, throughput is usually 20-40% below the quoted max. figures.
Actual throughput depends on the speed and experience of the operator, the type of laundry being ironed, the way it was sorted prior to ironing, the condition of the trough, and the standard of finish required.

Highlights

- Simple and convenient operation using large touch display
