APFD 400 rail

- For safe positioning of light-weight, shallow items on the cup rack
- Suitable for securing the lids of 6 beakers and feeding cups
- For use in upper basket of PG 8056 / 8061 dishwasher

Mat.no. 10869860
Art.no. 67540001D

Plastic beaker lids are valuable aids in hospitals, care and nursing homes, and child-care facilities. The new holder rail from Miele Professional delivers perfect results: It reliably holds light-weight lids tight, making sure they are exposed to jets of water throughout the entire program cycle. This guarantees perfect hygiene and simplifies work.

Added value across the board: Profit with ProCare Shine cleaning agents not only from improved hygiene but also from particularly effective dishwashing processes and proven machine compatibility.
